

KID'S VILLAGE

Family Weekly Newsletter: February 15-19th

March 3rd is picture day!

Sponge Paint Collage

Teeth Stampi

Teeth Collage

Pre-K

This week a main focus in all of our classrooms has been dental hygiene! The students learned about their teeth and what it means to take care of them! We practiced our brushing skills and talked about going to the dentist! In our Pre-K classroom, the students extended their learning about dental hygiene and made a stamp collage on teeth cut outs. This was a fun way to allow the children to interact with each other and discuss what they do to keep their teeth clean!

Preschool

In our Three's class this week Ms. Bertha worked with her students on their writing skills. In order for children to become confident with their writing skills they must be given enough practice and guidance. We worked with our students to help show them how we hold our pencils while learning the different letter in their name. Along with enhancing their writing skills Ms. Bertha also did a lot fun and engaging art activities with the students! We also discussed dental hygiene this week in our Three's class, the students review every day how we brush our teeth: Up and down and side to side!

Two's

Our two year olds also learned about dental hygiene with Ms. Raquel! The children showed Ms. Raquel how they brush their teeth during their morning gathering time! To help make talking about dental hygiene fun the students made teeth shaped collages! This encouraged conversation about dental hygiene amongst the children.

They all had so much fun making their collages and showing each other how they brush their teeth! While making their collages the children also had the opportunity to create a big bright smile using paint and paper plates! They all showed off their bright smiles and sparkly clean teeth!

Cuddle Bugs

Our one year olds had so much fun with Ms. Lynn this week! Everyone worked together in super fun and messy group art projects! Their favorite project to do together was finger painting! They got messy and explored mixing different colors together. To encourage dental hygiene with our little ones we sang

songs together about brushing our teeth during circle time! Ms. Lynn also went over body parts with the children and helped them identify where their teeth are! This is a great way to help the littles ones get excited about brushing their teeth at home!

HAPPY FRIDAY!

Enjoy Your Weekend!
